

CONFERENCE ABSTRACT

Prudent Health and Care: from principles to practice

2nd Asia Pacific Conference on Integrated Care, Melbourne, 11-13 November 2019

Helen Howson

This presentation will build upon the Plenary presentation given by Sally Lewis and outline how the Bevan Commission, an independent think tank in Wales, has influenced national, regional and local policy and practice. Prudent health and care will be examined from the macro, meso and micro levels through the lens of partnerships, professionals and the public, providing examples of the real-life innovation and transformational work being undertaken through the Bevan Academy programme. A proven successful model to engage people and practitioners as active partners in care re-design and social movement for change to ensure a health and care system fit for the future.
